RE: Closeout Reports for Buildings 560, T452F, T891F, and T891O

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the Closeout Reports for Buildings 560, T452F, T891F, and T891O, dated October 15, 2002. These are indicated to have been provided for our approval. However, as Type 1 facilities we generally receive these Closeout Reports for our information, review, and comment rather than approval. As such, we do have the following comment:

Closeout Reports should identify all removal activity and include a map of the facility identifying the structures involved, those removed, and the location of remaining infrastructure and its condition. Infrastructure includes all remaining materials and their location, and includes slabs, piers, footings, water pipes, gas lines, electrical conduits, drain lines, PWLs, sewer lines, etc. These maps are necessary for possible ER and/or future stewardship concerns. No maps have been provided for any of these facilities. The discussion provided for T891F, which had plant water and sanitary hook ups, does not specifically address the infrastructure removed or remaining. Therefore, appropriate discussion for T891F indicating the condition of remaining in-ground infrastructure, and maps for all of these facilities need to be provided.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson
